

## Adjectives...

**Adjectives** are describing words.

They tell us more about a **noun** – a thing or object, like a whale or another animal or a part of it, like a fin.

The **huge** **whale**

The **spotty** **whale**

You can use more than one adjective in the same sentence.

If you do that you usually put a comma between them.

The **huge, spotty** **whale**

Often, adjectives come before the noun they are describing.

The **huge, spotty** **whale**

But they can also come later in the sentence.

**Whales** are quite often **huge** and **spotty**.
